Re: WhaleFest Bubbleology Workshop @ Brighton Science Festival

Dear Louise and all at the Synergy Centre,

We would like to take this opportunity to thank you and the staff of the Synergy Centre for facilitating our event during the half-term week at Brighton Science Festival.

The bubble workshop was much more popular than we anticipated with almost 1200 parents and children attending the event over the two days. In fact, at one point we had 170 people through the doors in the space of an hour!

Despite this hecticness and our peculiar requirements (which unfortunately come with running science events!), everyone at the Synergy Centre went out of their way to accommodate us and facilitate the event. It is safe to say that without the dedication, expertise and patience of Dave, Steve and yourself the event certainly would not have gone as smoothly as it did.

The Synergy Centre is a fantastic community space that lends itself to all manner of events and I look forward to working with you all again on projects in the future.

Best of luck with the ongoing restoration and overhaul of the building; I'll be very excited to see it when it is finally up and running in its full capacity.

Kind regards,

Russell Arnott
